CAMION TRANSPORT

Crane transports and goods storage throughout Switzerland

We expanded our goods transport and warehouse logistics portfolio with a crane logistics sector at the beginning of 2015. We have 28 special vehicles, 24 of which are equipped with a range of powerful cranes. Managed centrally by our crane logistics centre in Winznau SO, our crane fleet is spread across various locations in Switzerland – including one in your area.

Crane logistics services

What's special: We are a one-stop shop. We fulfil transport services with boom trucks, and cover the entire supply chain: From import handling, storage with our warehouse management system through to order picking and transport.

Special in-house training – the norm

Great care must be taken when carrying out transport services with boom trucks. High quality and a safety guarantee are our benchmark. We are a certified training centre and regularly coach our drivers particularly in the fields of load securing, eco-friendly driving and careful crane guidance. Our boom truck drivers all complete the training for crane operator cat. A.

Crane logistics centre

Our locations in Winznau SO and Thal SG offer ideal conditions for processes that require hoisting equipment. The locations have 9000sqm for storing heavy goods and overhead cranes with a 10t lifting capacity.

Collection by boom truck

Storage with overhead crane

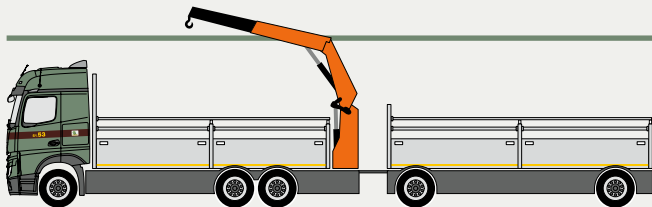

Our special fleet is ready to roll

Our crane fleet is comprised of state-of-the-art vehicles, compliant with the Euro 6 emission standard. The units include: Five-axle truck/trailer combinations with a rear-mount boom crane 17 m/t, plus open tractor and truck/trailer combinations including crane with double forks specifically for building site deliveries and special

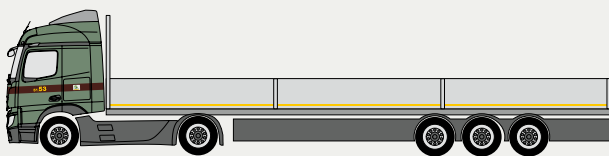

transport services for 30m long items with a 3m maximum width.

We look forward to working with you and mastering your challenges.
